NEIGHBORHOOD MATH EXPERTS SET UP SHOP IN Newport Beach

Mathnasium Operates on Core Belief That Every Child Can Become Great at Math

Newport Beach, February 1, 2018—Mathnasium of Newport Beach is now open for business, bringing fun and effective supplementary math programs for community children in grades 2 through 12.

The learning center, located at 2610 E. Coast Highway, focuses solely on math and operates on the core belief that virtually any child can excel in the subject. The Mathnasium Method™, implemented at more than 800 Mathnasium centers in the U.S. and abroad, is a unique program that provides each child with a customized learning plan and personalized instruction in a way that makes sense to them. “Our students will receive the fundamental practice they need to master number facts, build computational skills, and improve number sense, an intuitive understanding of how numbers work,” said Jasmin Mortazavi, owner of the Mathnasium of Newport Beach franchise.

“Our goal is simple: to teach math in a way that makes sense to kids,” Mortazavi continued. “Mathnasium centers across the country have helped struggling students develop into ‘A’ students and ‘A’ students go on to even greater achievements. We are thrilled to be able to bring our Mathnasium Method™ to support the families of Newport Beach.”

The Mathnasium experience begins with an assessment designed to pinpoint a child’s strengths and weaknesses. These results provide the foundation from which Mathnasium constructs the student’s customized learning plan. Students learn math in a friendly, productive learning environment and are taught by caring and knowledgeable instructors well-versed in integrating Mathnasium’s techniques with the math curriculum used in Newport Beach schools. The Mathnasium Method™ uses a unique combination of mental, verbal, visual, tactile, and written techniques to help children really understand math and has been developed over more than 40 years of practical experience with thousands of students.

Mathnasium students receive the support they need for school homework and tests while building their math foundations. “As educators, we strive to offer Newport Beach students a balanced math learning experience: one that fills in the gaps, keeps students on track with math taught in school, and, most importantly, makes learning math a fun and joyful experience,” Mortazavi concluded.
